

STAGE 02 | PROJECT PRINCIPLES

INTRODUCTION

The stage two work was carried out between the 28th June 2101 and the 23rd Huly 2010. During stage two of the project the master planning team consolidated all the public feedback and comments generated from the online collaborative map and workshop to established high level project principles to guide the master plan. The project principles were derived directly for the objectives of the Callan Park [Special Provisions] Act 2002. Thirteen project principles were proposed and these received broad community support, following some fine tuning these final project principles wee uploaded onto the project website as part of the public record of the project.

In stage two the Master Plan team also carried out a precinct review to assess the balance between the uses on Calla Park. The analysis demonstrated that Community and Educational are the two largest uses on Callan Park.

Development of the Project Principles

Callan Park is a unique site that is protected by a unique piece of legislation, the Callan Park [Special Provisions] Act 2002. The Callan Park [Special Provisions] Act has five objects. From these objects the Master Plan Team extracted the Guiding Purpose of each object to summarise the intention of each object. Under each 'Guiding Purpose' the Master Plan Team proposed a number of draft Project Principles.

The table on page xxxx illustrates the progression from the Callan Park [Special Provisions] Act 2002 through the 'guiding purposes' to the Project Principles.

PRECINCT REVIEW

The Callan Park Land Use Plan 2007 suggested eight precincts to organise the proposed uses on Callan Park. Although the precincts were never adopted they are often used by individuals and groups as associated with Callan Park as geographical points of reference.

Figure no. 1 illustrates the location of the following precincts on Callan park:

- 1. Waterfront Precinct
- 2. Kirkbride Curtilage Precinct
- 3. Parkland Campus Precinct
- 4. Non Government Organisation Precinct
- 5. Church/Glover Street Precinct
- 6. Wharf Road Precinct

- 7. NSW Ambulance Precinct
- 8. Nurses' Precinct
- 9. Child Care [added after the Land Use Plan 2007]

The Land Use Plan set out a series of development controls for each precinct, these being:

- Preferred Land Uses
- Maximum Gross Floor Area
- Maximum Built Footprint
- Building Height
- Minimum provision of open space
- Additional Provisions

The objective of the land Use Plan precincts was to codify development within the different areas of Callan Park. The definition of the precincts seems to have been predominantly governed by the projected uses rather than existing uses or character areas.

Existing Tenants

Figure no. 02 on page 88 identifies the current tenants on Callan Park. The tenants have been organised according to the three uses permitted under the Callan Park Act; community, Education and Health. The white buildings indicate the extent of vacant premises currently on Callan Park.

Buildings are predominantly occupied on the western side of the site following directives from the NSW Government.

Existing use distribution

The Callan Park Act set out three possible uses on Callan Park, Community, Education and Health. The following diagrams illustrate how these there uses are currently distributed on Callan Park and indicate the vacant buildings on the site.

Community

Callan Park is currently open and accessible to the public. The only expectations to this are the courtyard spaces that are associated with some of the larger buildings currently occupied by Sydney College of the Arts, NSW Ambulance and the University of Tasmania.

Education

There are currently three main providers of education on Callan Park, with the largest being Sydney College of Arts based in the Kirkbride Complex. Smaller teaching facilities are used by CCDWD for nursing

CONSULTATION SUMMARY

During stage two of the master plan the following consultations were carried out:

Online consultation and participation

Website open for feedback -26 July until Friday 13th August

Registered users were invited to agree or disagree with the draft project principles. The final results of the online consultation demonstrated over 88% or 'agrees' with the draft principles. As a result of this feedback and detailed comments from an online survey final Project Principles were drafted.

Website visitation

The following statistics show the online traffic generated during stage two of the web based consultation:

- 1,321 Visits
- 6,254 Page views
- 4.73 Pages/Visit
- 04.59 Average minutes on site per visit

Community workshops

Community Workshop 3 & 4 - Saturday July 24 2010

This workshop began with a detailed discussion of the Callan Park [Special Provisions] Act 2002. This unique piece of legislation de-

scribes what can and can't be done at Callan Park. The draft Project Principles which will guide the Master Plan team in their work are based on the five objectives of the Callan Park [Special Provisions] Act 2002. More than 50 workshop participants worked in small discussion groups to provide consensus feedback to the draft Project Principles. After the workshop the worksheets completed during the session were published on the website.

Stakeholder engagement

Existing lease and landholders - Tuesday 6 July

Purpose: to inform this group of the structure of the Master Plan process, including the web based consultation process and the proposed meetings with other organisations and stakeholders.

Issues raised and discussed:

- Description of the activities and services carried out on Callan Park
- Interpretations The Callan Park (special Provisions) Act 2002
- Parking
- Making submissions during the process

Leichhardt sporting groups - Monday 19 July

Purpose: to inform this group of the structure of the Master Plan process, including the web based consultation process and the proposed meetings with other organisations and stakeholders and to learn how local sporting groups currently use Callan Park.

Issues raised and discussed:

ABOVE. Callan Park Uses Diagram

- The inability of most sporting representatives to attend workshops on Saturdays
- The lack of sports field within the Leichhardt LGA
- The sporting calendars of the groups present
- Making submissions during the process

Update to Leichhardt Councillors - Tuesday 20 July

Purpose: to provide local elected representatives with an update on the progress of the Master Plan, and feedback on emerging issues and participation.

Issues raised and discussed:

- An update on the process where we are and what next
- Community participation and workshops
- Importance of Mental Health services on Callan Park

Wednesday 21 July – Friends of Callan Park

Purpose: to provide the Friends of Callan Park with a preview of the Draft Mental Health Discussion Paper.

Agreement with the five areas of focus for mental health services on Callan Park:

- Health & Lifestyle
- Vocation & Social
- Residential
- Information & Support
- Education, Training & Research

Have your say stage 2

Stage 2 of community engagement for the Callan Park Master Plan commenced with a workshop in the Callan Park Recreation Hall on Saturday 28 August.

This workshop introduced the Draft Project Principles, which were launched online at callanparkyourplan.com.au on Monday 30 August.

After analysis of Stage 1 issues and opportunities, the Draft Project Principles presented to the community were based on the objects of the Callan Park (Special Provisions) Act 2002, the unique legislation designed to protect and promote Callan Park.

Leichhardt Mayor Jamie Parker introduced the workshop to a background of the legislation.

Links to the Callan Park (Special Provisions) Act 2002 were included on the Have Your say page of the website.

The results of this stage indicate strong support for the Draft Project Principles as presented to the community.

Online, most contributors chose not to comment on the principles, instead either Agreeing or Disagreeing. All the comments of those who added words to their Agreement or Disagreement are included in this report.

At the workshop, participants agreed to form a united 'Table Response' to the Draft Project Principles. All the comments generated by the tables are included in this report and are marked (WST - with a table number).

The Draft Project Principle with the least community support was 'Link community, health and educational uses to create a single shared identity at Callan Park'. Many disliked the idea of a shared identity, with its connotations of a commercial brand. This Draft Project Principle has been revised to reflect community suggestions about how to improve it.

Objects of the Callan Park (Special Provisions) Act 2002

- a) to ensure that the whole of Callan Park remains in public ownership and subject to public control, and
- b) to ensure the preservation of the areas of open space at Callan Park that were in existence immediately before the commencement of this Act, and that extend to and include the foreshore of Iron Cove on the Parramatta River, and
- c) to allow public access to that open space, including the foreshore, for public recreational purposes of both an active and a passive nature, and
- d) to preserve the heritage significance of Callan Park, including its historic buildings, gardens and other landscape features, and
- e) to impose appropriate controls on the future development of Callan Park.

Object	Guiding		Background	
Object a) to ensure that the whole of Callan Park remains in public ownership and subject to public control	Governance 93% support		The Callan Park Act says that the Minister can contract the care, control and management of Callan Park and its buildings to Leichhardt Council or to a trust. The community has made suggestions about how Callan Park can be managed to ensure representation and transparency. The Callan Park Act does not define how a trust should be structured. How could a trust be structured to ensure that it can fund and manage the care and control of Callan Park in an equitable, transparent way that is representative of the public?	
DRAFT PROJECT PRINCIPLE	AGREE		DISAGREE	
Ensure public representation and accountability in the body that governs Callan Park.	Online	79	Online	2

Ensure Callan Park is a world-leading model for social, environmental and economic sustainability.	Online	61	Online	12
	Workshop	8	Workshop	1
	Total	69	Total	13

Governance 93% support! !		
Ensure public representation and accountability in the body that governs Callan Park.	Provide a suitable transparent governance structure that can fund and manage Callan Park.	Ensure Callan Park is a world-leading model for social, environmental and economic sustainability.
<ul style="list-style-type: none"> Need to ensure that the Park is maintained for the purposes intended for public space not commercial purposes. The public will not benefit from commercial use and ensure commercial sell offs will not occur There should be an overriding body to ensure probity and transparency. Organisations selected for the site should be selected on their merits not just because they make comments on the master plan. It is important that the public have some involvement in what happens at Callan Park because it is a vital community resource, being affected by the outcomes, should be involved in the governance In order the park to be optimised some of the facilities should be placed in the hands of the sporting bodies or organisations. This would ensure correct and maximum usage of the facilities provided seems obvious at this stage of Callan Park story that community cherish as public asset- but point to add is should be substantial local, community and resident representation in governance body Callan Park is far too valuable to be shrouded in secrecy a majority local community representation -it's a public site with a specific local and community focus and in terms of its effects Callan Park should be managed by a trust that is accountable to the public governance of callan park needs to be explicit and transparent to ensure this valuable public space is not exploited for commercial gain Independent body broad representation Trust (WST1) Should include local (meaning residents and Council), also need skills and expertise (WST3) Define public representation. Include the word 'local'. How is governing body determined? Who chooses the members? Accountable to whom? Trust? (WST4) Trust with public representation (WST5) Needs to address the breadth of public representation (WST6) 	<ul style="list-style-type: none"> The cannot be integrity without complete accountability This will ensure transparency and accountability from the organisations using the site Not certain of the background to this principle. Funding will need to be secured from a range of sources, including, probably, local, State and federal governments. Transparency is very important to promote community trust in the future developments and use of the site obvious transparency and accountability are basic for all public and community sites - esp ones so cherished Needs to be a representative body that can attract funding from government and other sources towards being self-sufficient relating to local government and local community (WST1) Meetings should be open and transparent whoever is the governing body. Management and funding should be considered separately - otherwise local Council ruled out (WST3) Could you provide a discussion paper that details legally valid options for the governing body and discusses the positives and negatives of each one (WST4) Trust with public representation (WST5) Transparency is the key so a clear process for transparency is required (WST6) Provided it includes a trust as an option for discussion (WST7) Is it going to be a trust or an elected body? Who will form them? We respect the work of the Friends of Callan Park and expect them to be represented appropriately. (WST9) 	<ul style="list-style-type: none"> Ensure Callan Park is a world-leading model for therapy. Social, environmental and economic sustainability are secondary, though part of the whole. Sustainable has almost no meaning. Nicely idealistic but hard to implement especially when the three principles will often be in conflict. Incidentally what does "social sustainability" mean This is not a competition, or a chest thumping exercise for politicians The master planning process offers an opportunity to make Callan Park sustainable, an opportunity we should not miss. Having a working City Farm on site would be a great way to do this. Would like Callan Park to be a world leading site for mental health facilities as it was originally set up for get great plan - if it turns out to be unique by world standards in mixing mental health with community's enjoyment, in capitalizing and building on local community's history of sharing thus - great Callan Park should be a world-leading mental health facility - it should be a true asylum Mental health, aboriginal heritage, horticulture historical (WST1) Motherhood statement - not critical - nice to have (WST2) Aim for zero emissions - close many roads, tri-generation, water-recycling, plant species, staged introduction of 'no-traffic' days, BBQ's and lights powered by solar (WST3) Replace 'world leading' with 'best practice' - world leading model is unquantifiable (WST4) Good goal - yes has to be a world class model - should be supported by State and Federal Government (WST5) 'World leading' clearly ambitious suggest 'best practice' (WST6) Will be happy if we are outstanding (WST7) Further consultation with other professional and non-professional stakeholders working with patients (WST8) The three tiers of government should fund

Object	Guiding	Background		
Object b) to ensure the preservation of the areas of open space at Callan Park that were in existence immediately before the commencement of this Act, and that extend to and include the foreshore of Iron Cove on the Parramatta River	Preserving and Managing Open Space 98% support	The Callan Park Act says that new development at Callan Park should not result in less open space than exists now, or more built floor area than exists now. However there is more to preserving open space than just restricting development. Open space must be managed and maintained. The community has raised issues about funding and maintaining all areas of Callan Park. How can the Master Plan ensure the preservation of existing open space at Callan Park?

- Need to ensure that the Park is maintained for the purposes intended for public space not commercial purposes. The public will not benefit from commercial use and ensure commercial sell offs will not occur
- There should be an overriding body to ensure probity and transparency. Organisations selected for the site should be selected on their merits not just because they make comments on the master plan.
- It is important that the public have some involvement in what happens at Callan Park because it is a vital community resource, being affected by the outcomes, should be involved in the governance
- In order the park to be optimised some of the facilities should be placed in the hands of the sporting bodies or organisations. This would ensure correct and maximum usage of the facilities provided
- seems obvious at this stage of Callan Park story that community cherish as public asset- but point to add is should be substantial local, community and resident representation in governance body
- Callan Park is far too valuable to be shrouded in secrecy
- a majority local community representation -it's a public site with a specific local and community focus and in terms of its effects
- Callan Park should be managed by a trust that is accountable to the public
- governance of callan park needs to be explicit and transparent to ensure this valuable public space is not exploited for commercial gain
- Independent body broad representation Trust (WST1)
- Specifically maintain heritage gardens, maintain existing open space, regeneration of bushland on Callan Point, recognition of Callan parks inherent tranquility and need to protect this (WST3)
- The principle acknowledges that the open space footprint is preserved, but that remediation and restoration activities are appropriate. It should also cover the retention of sight lines to the harbour (WST4)
- Does the term 'community lands' address the issue of boundary situations e.g. SCArts open space meets community 'open space' (WST6) (should include the word) maintain as well as improve - flexibility (WST7) We agree with above (WST8)
- we need to keep in mind and take into account the needs of the mentally ill in relation to the use of open space areas. The open space has to be preserved for all wildlife that live in the park (WST9)

Object	Guiding Purpose		Background	
Object c) to allow public access to that open space, including the foreshore, for public recreational purposes of both an active and a passive nature	Public Access to Open Space that offers Active & Passive Recreation 92% support		The Callan Park Act does not describe how best to provide and maintain public access to the open space at Callan Park. There are many issues around access to and within Callan Park: car travel, parking, bike access and facilities, public transport services, access by water, and pedestrian safety within Callan Park. The Callan Park Act does not describe how to manage equitable access to individuals and groups who want to engage in active and passive recreation. The community has many aspirations about, and suggestions for, the types of active and passive recreation which can be undertaken at Callan Park. How can the Master Plan address access in a way that is consistent with the objects of The Callan Park Act?

Public Access to Open Space that offers Active & Passive Recreation 92% support!!		
Preserve public access to open space and the Iron Cove foreshore	Develop public transport and infrastructure to broaden public access and reduce traffic intrusion	Ensure an equitable balance between passive and active recreation to contribute to community health and wellbeing
<ul style="list-style-type: none"> - I support Friends of Callan Park, ensure it is like the Centennial Park of the Inner West. - Should increase access to the public where possible. - The Bay Run is an immensely popular recreation use which needs to be upgraded and maintained. The site also provides important green space in the innerwest. - Callan Park is a community resource, and access and use by all factions should be encouraged - sports, cycling commuters, dog walkers - It is critical that Callan Park remain open space for sporting groups to ensure that the health - Green space is precious to this community which have small yards, high density and lack of public green space per capita than other most other municipalities - Precious in high density area for so many reasons - Yes maintain 2002 conditions in relation to areas dedicated to Mental Health & public access (WST3) - Strong planning consideration of access (WST4) - Look at safety issues for park and people using park. Safe areas for patients to walk in to be monitored could friends or carers come to take for a walk. Previous arrangements for Park worked well with local community users. (WST8) - Callan Park as an entity keeps people sane - our spiritual recharge - a preventative, but some of us would like to see something specifically for the mentally ill (WST9) 	<ul style="list-style-type: none"> - This is a double-edged question. No reason to reduce current traffic levels, though more traffic would not be a good idea. However, I see the issue of public transport as HUGELY important in the area. - With public buses running along the boundary public transport is probably OK. There is a very difficult balance in keeping the green space while providing parking for the public who need to travel to use it. - Buses that currently run along Darling St and Balmain Rd will suffice. And with the possible light rail not too far away. Allowing parking facilities will be a disaster. It worked fine for years as is. - But also to keep motorised vehicles out of the park as much as possible - Traffic and parking should be strictly minimised in park when thinking of broadening access remember about 86% of the municipality use Callan Park in some way already - Council Piazza study 2008 - Community fought hard for this green space. None of it should be traded for car parking this means no more cars in park than currently - it's at limit, arguably too much already cars hurt sanctuary - Eliminate cars except for disability access. Shuttle buses (WST1) - Another motherhood statement (WST2) - Close off roads wherever possible, minimise parking, remove foreshore parking, provide disabled parking, limit hours of deliveries (WST3) - Limit motor vehicle access. Separate pedestrians and cycling areas (WST4) - Reduce cars (WST5) - Traffic not an adequate term - you mean motorised traffic? Separate cycling and walking (WST6) - Concerns of public transport through the park - no government buses through park happy with community buses (WST7) - Ferry stop, public transport stop OK. No to horseriding, not to speed cycling make cycleways on roads, yes to leisurely children and women. Lock park up at night to prevent vandalism, hoon speeding. Give regular groups keys to lock up (WST8) - Please bear in mind the needs of physically disabled, elderly, parents with prams (WST9) 	<ul style="list-style-type: none"> - Clear divisions between passive and active space need to be managed. Callan Park was a place designed for contemplative healing, and quiet pockets are important. - It is important to recognize that passive recreationists are not organized in the way that sporting groups and other interest groups area. If groups with multiple members lobby for an imbalance of activities at Callan Park, this lobbying should be adjusted to account for the lack of organization by individuals. Group feedback should not overwhelm the process. The Master Plan must balance needs and desires to achieve an outcome that is best for the community. - We need to address the need for psychological and spiritual 'fitness' as well as physical fitness. I suggest a labyrinth for walking meditation. - Sufficient space must be allocated for the use of local Community Sporting Clubs as there are currently too few grounds available to cater for the numbers of local residents wishing to participate - I don't understand what this one means! I agree that there needs to be space for quiet contemplation. - Balance is important in this area, the site is important for organised sporting groups, but also provides much needed natural green recreation space for individuals. - I support some active rec but is risk it gets too much voice compared with so-called passive because of way sport groups able to organise. Past surveys show huge prefs passive but no pass rec club - This question does not make sense - the park used to belong to the mentally ill and it should be returned to them as soon as possible. Only then will there be a "balance" in its use. - Keep current balance forbid private interests in sport (WST1) - Prioritise passive over active - less land dedicated to sports facilities (or nonr) Specialised picnic facilities should only be provided within existing sports facilities (WST3) - Keep informal in the balance. Retain passive space for creative, imaginative exploration, not over prescribed activities (WST4) - Diverse useage for all community No third oval, 2 is plenty (WST5) - To be screened by Callan Park Act (WST8)

Object	Guiding		Background	
Object d) to preserve the heritage significance of Callan Park, including its historic buildings, gardens and other landscape features	Preserving the Heritage Significance of Callan Park 92% support		The historic buildings at Callan Park do not all have the same heritage significance. The community has made many suggestions about which buildings might be suitable for particular uses. How can the Master Plan ensure that adaptive re-use of buildings will maintain and potentially enhance the heritage significance of Callan Park?

Preserving the Heritage Significance of Callan Park: 92% support! !		
Ensure that best practice conservation processes are applied to historic buildings, gardens and other landscape features	Encourage public use of buildings acknowledged as having the most heritage significance	Ensure that the history of Callan Park is celebrated and documented on site
<ul style="list-style-type: none"> - Strange no comments. There must be some balance with sustainable conservation - I think the historic sandstone and other buildings should remain and the gardens restored. Possibly the newer buildings could go. - The site has enduring historical value which can be successfully maintained while being re-purposed for current community needs - I would want the buildings used for accommodation - not roped off as museums - and heritage preservation of culturally, aesthetically and historically significant trees - green space is precious to this community which have small yards, high density and lack of public green space per capita than other most other municipalities - Strongly support (WST1) Not always necessary to employ expensive - heritage architects (WST3) - Retain buildings from ALL eras to reflect the amenity and history of the site (WST4) - Heritage can be cultural and/or environmental (Burra Charter) needs to reflect Environmental Heritage (WST6) - Broughton Hall overlooked in heritage study - redefinition into Exceptional (WST7) - As stated and as has existed in Park. (WST8) - Aboriginal history and acknowledgment is essential (WST9) 	<ul style="list-style-type: none"> - Important that the Park is alive and functioning. - A good aim but secondary to the primary function of providing care, which should be fulfilled in priority. - Public access is worthwhile preserving but public use might not be the most appropriate for potentially fragile buildings that are expensive to maintain - Active use = ongoing maintenance. - But also ensure commercial interests don't take over other buildings. Should have sense of public access to all of the site. - The heritage buildings are a beautiful public resource which need to be used, the site is perfect for art and music festivals, and active use would help fund maintenance. - This is more vague jargon that I cannot fathom or comment on. - This is vague and does not make sense until the major buildings are used to support people with a mental illness - Strongly encourage. Less significant buildings open to propositions (WST1) - Another motherhood statement (WST2) - Change the word 'use of' to 'access to' (WST3) - Yes for community groups. Priority to mental support group rehabilitation groups disability 1 in 10 children in schools, Autism groups, 1/4 youth anxiety due to drinking, Support Groups (WST8) - No private or exclusive use of the best heritage listed buildings - but mentally ill issues should override this (WST9) 	<ul style="list-style-type: none"> - Be good to be in the Sydney guidebooks finally. - The mental health history should be primary. The memorialised history should show how CP's contemporary functions fulfil, and the continuity of, the original trust. - Callan Park is a cultural landscape of national significance - "celebration" sounds like bread and circuses! - I would like mental health facilities to be returned to Callan Park and be part of its current 'living history'. - mental health history very important - should be respected - and hopefully continued...community unique in its capacity to share site with mental health - This is a side issue, a mere distraction that should be postponed until Callan Park is given back to the mentally ill, for whose curing it was originally developed and from whom it was shamelessly taken away. - i support some active rec but is risk it gets too much voice compared with so-called passive because of way sport groups able to organise. Past surveys show huge prefs passive but no pass rec club - This question does not make sense - the park used to belong to the mentally ill and it should be returned to them as soon as possible. Only then will there be a "balance" in its use. - Memorial gardens, permanent exhibition, Information Centre (WST1) - Signage and Callan Park include a local history museum or display Aboriginal cultural centre & history museum or in a heritage building (WST3) - In aesthetically acceptable (WST4) Overall protection plan - security.ranger? - (WST7) - Keeps in public focus the history of the Park. Continue historical walks and please educate the public on mental health (WST8) - Not only documented but a more permanent museum? (WST9)

Object	Guiding		Background

Future Development of Health, not-for-profit Community and not-for-profit Education Facilities at Callan Park: 82% support		
Ensure an equitable balance of community, health and educational uses at Callan Park	Link community, health and educational uses to create a single shared identity at Callan Park	Ensure that community, health and educational uses at Callan Park demonstrate a commitment to social, environmental and economic sustainability
<p>What does equitable mean in this context??</p> <p>I agree with all or most of these principles, but the fact is they are "motherhood" statements, that no- one would disagree with. I use Callan Pk for soccer, jogging, cycling, film-making, picnics..</p> <p>The function of mental health upon which trust the land was first sequestered must remain primary. CP provides first a continuous path back from illness to healthy and happy social integration.</p> <p>As long as the land is put to good use then there shouldn't be a need to define what that use is. Why close doors?</p> <p>I would like to see a more specific reference to mental health uses.</p> <p>We need to pull our rapidly declining quality of mental health care services out of a Third World mentality and re-create world class examples of rehabilitation and recovery services on this site.</p> <p>Need specific reference to mental health uses. Also, use for musical and other artistic pursuits - see Melbourne's Abbotsford Convent as a great model - www.abbotsfordconvent.com.au/</p> <p>The park should be financially sustainable with capital subsidies only and if necessary. This may include some commercial components</p> <p>Health and education are very broad aims, I would like to see a City Farm included here, as it provides environmental and educational benefits for the community, and can link to mental health too.</p> <p>If places are used, they are protected.</p> <p>My concern here is that educational services in this country are a significant revenue stream. We need a clear understanding of how equitable services will be determined. Financial or social equity?</p> <p>Buildings should be used for accommodation, not education. tricky term to agree or disagree with - Equitable does not mean 'equal' but means 'fair' by a justifiable measure. eg an equitable taxation system is not necessary equal for all.</p> <p>Equitable is vague. Could it mean 1/3 of the land area devoted to a private health complex for the rich? If so, I oppose this idea- public benefit is paramount.</p> <p>Restore the public psychiatric hospital. People with a chronic mental illness need the tranquil environment to recover from a psychotic episode. This right that was taken away with the hospital closure.</p> <p>equitable is a vague term</p> <p>public mental health uses please...stepped recovery use for cottages and make this not for AA etc or the ex head of NRMA but for chronic mental health eg schizophrenia suffers</p> <p>There should be some reference to using the park to help people with mental illness. Callan Park used to belong to the mentally ill and it was taken away from them.</p>	<ul style="list-style-type: none"> - What does this mean? Single identity??. - Will a linked community system mean excessive branding in the corporate sense of the word? The danger of this could be a reduction of Callan Park's capacity to be interesting and varied. . - A single identity suffocates those who disagree, and in particular the mentally ill. - As long as the management of the Park as a whole is run by a single body why is it useful to force disparate users together? - I do not understand what this means. - Callan Park was given to the community for mental health purpose, and should remain a health orientated environment.. - Only if it all relates to mental health e.g. community farm worked by residents of Callan Park rehab services and the local community. - Having spent most of my years walking the grounds of CP.I thought it excellent for those needing mental health help while remaining part of the community and tucked away from society. - Make sure the site is not overly commercialised. Needs to preserve a community feel, and a sense of safety and sanctuary for those seeking help for mental illnesses. - There may be financially viable parts e.g concessions for eating and drinking,retirement housing, other tasteful housing, retail and commercial in line with the rinciple of financially sustainability - I'm not sure the wide range of uses of Callan Park can, or should, be molded into forming a 'single' identity. Common principles can govern a range of activities on the site, activities be distinct. - Mental health is missing from the questionnaire. A state-of-the-art psychiatric teaching hospital is needed and the park shared with the public as it used to be. - What do you mean by "health"? Why no specific mention of mental health. - Peace linked to mental well-being is possible link - the community, mental health and SCA have informally shared it under this identity historically - it can continue 	<ul style="list-style-type: none"> - The original trust for therapeutic purposes must remain primary and perpetual. These considerations are meretricious - can be used to subsume the original trust, whilst describing as e.g. "sustainable" - Shouldn't this just be that future user's of the park should reflect the principles of the park trust (as a condition of their lease)? - Leave setting world benchmarks to the judgement of others. Public transport is a fine ideal but private transport is practical for children, dogs and those with mobility issues and is functional 24/7. - Sustainability is essential to ensure that Callan Park is retained as a community resource long into the future. - I hope the 'health' and 'education' includesmental health facilities. - implications of agreeing with this are too hazy and unclear - esp economic sustainability - Why is mental health missing from the questionnaire?I cannot agree with such vague statements. - agreeing with economic sustainability should not be taken as license to ruin the sanctuary-like character of park sympathetic with mental health by turning into events park - This is rather obvious; I agree with it on the condition that the prime health use of the park is to help those with mental illness.
